

CHRIST'S POWER IS PORTRAYED BY THE REV. SHIELDS

New Pastor At Presbyterian
Church Preaches His In-
itial Sermon

DIVINE POWER SHOWN
IN 3 PHASES OF LIFE

Large Congregation Greeted
Rev. Shields On Appear-
ance At First Service

In his initial sermon at the First Presbyterian church here Sunday, the Rev. W. H. Shields, the new pastor of the church, who succeeds the Rev. W. A. Clemmer, now in St. Louis, impressed his audience with an exceptionally powerful portrayal of the power of Jesus, the Master, over men and their natural, intellectual and moral lives.

A large congregation greeted Rev.

THE REV. W. H. SHIELDS
New Pastor of the Presbyterian Church, Who Preached His Initial Sermon
Sunday Morning

Shields for his first appearance in the pulpit of the local church.

The sermon that was delivered by the Rev. Mr. Shields was taken from John 13:13, namely: "Ye call me Master and Lord and ye say well; for so I am."

In the subject with which he dealt, the new pastor emphasized the power of Jesus, the Master, over the three phases of man's life. In the natural life of some people more than others, is the spirit of Jesus apparent. Others are classed as ungodly have the spirit of

Jesus in their spiritual life while still others show the power of Jesus over their intellectual life more than in any other way.

Speaking of the latter phase, His power in life of man, Rev. Shields cited H. G. Wells, the English author, as an excellent example of the power of Jesus over this man's intellectual life as shown in his works. Other illustrations were presented by the pastor in his sermon that gave his interpretation of the verse from which he had taken his text.

In closing his sermon, Rev. Shields brought out the point of his sermon in urging his congregation to look into their own lives—all phases of it—and see whether Jesus was powerful in them as He should be.

REV. GRAYSON WILL ACCEPT CALL TO A NEW YORK CHURCH

Rev. A. Grayson, pastor of the Calvary Baptist church in this city, has notified his congregation that he has accepted a pastorate in New York city and expects to leave soon to begin his duties in the larger field. Rev. Grayson tendered his resignation to the local church several weeks ago, but the parishioners refused to act on it and so Rev. Grayson announced his determination to accept the call to the larger church without regard whether his resignation was accepted or otherwise.

CAISSON CLUB MIGHT SEND DOWN NECKTIES

New Orders About Wearing
Them Issued—Notes
From Camp Sheridan

(By WALTER H. HUNTSBERRY,
Correspondent for The Banner.)
CAMP SHERIDAN, Ala., Oct. 4—Well, we are pretty well located by this time. All the ground around the tents is leveled off and the fellows are getting along fine in the new life. The following is our schedule:
First call for reveille—6 a. m.
Assembly for reveille—6:15 a. m.
Mess—6:30 a. m.
Drill—7:15 a. m.
Recall—11:30 a. m.

Mess—12 noon.

Drill—1 p. m.

Recall—4:30 p. m.

Sick call—4:30 p. m.

Mess—5 p. m.

First call for retreat—5:45 p. m.

Assembly for retreat—6 p. m.

Call to quarters—10:15 p. m.

Taps—10:30 p. m.

You see by the above that we do not have much time to ourselves. In fact, the only time we have to ourselves is at night.

Some of the fellows go to town at night and some stay around the camp, writing, playing cards and singing.

Lawrence Lemley must like the Alabama street cars because he takes a ride on them every night.

"Snookie" Taylor met a girl at North Vernon, Ind., that he took a liking to, so the other day he asked the captain for a furlough to go to see the girl.

Faye Strang had the habit of walking home from his girl's house in his sleep, so a night or two ago he started home and fell off of his cot.

The weather down here is like the icy-hot bottle. Twelve hours hot and 12 hours cold. We get pretty cold at night.

"Jim" Graham went to bed one night with his clothes off and when he got up in the morning he had everything on except his leggings and shoes. He got colder and colder and dressed piece at a time.

"Rabbit" Schaeffer has a patent of his own. He ties his shirt to the top of his tent and when he gets cold in the night, he simply pulls a string and his shirt drops over his head.

But to lay all jokes aside, I believe we will be warmer from now on. We

received straw tonight for our bed sacks.

The eats are fine. I suppose the old mess-hall looks dead and the Oakland restaurant has gone out of business.

The special detail under Lieut. Hosback has taken up its original work. They took an eight-mile hike the other day and tried to find the Alabama river but did not succeed. The work in this department is very interesting.

The army Y. M. C. A. is a great thing for the fellows. The one down here is filled every night. Something special every night. Tonight there is a pianist and soloist and Friday night there are moving pictures.

There is plenty of band music down here. Every morning at 6 the band marches down the main drag to waken the fellows. They also play at retreat and have concerts at night.

Orders were given a few days ago not to wear neckties on duty, but to wear them when you go to town. Lots of the fellows haven't neckties and have to borrow them when they want to go to town. Orders were also given that if every fellow had a black necktie that we could wear them in the field or on duty. I think this would be a good stunt for the Caisson club, to send some black ties. We cannot buy any for there is no money to buy with.

I saw a piece in your Tuesday's paper about Mt. Vernon going into bankruptcy. I knew something would happen to the old town when E Battery came away. The people will soon realize that we were the backbone of the burg.

It is 8:30 and we generally go to bed about that time, so good-night, with thoughts of the old town.

The Government says "Conserve Coal Consumption"

What We Say for the Florence Stove

The only jointless leg bottom and base with full radiation and large ash pan that is on the market or has ever been made in the history of the stove industry.

The jointless leg bottom and base makes the stove air-tight below the grate, which is the only true fire-keeping principle.

It will be as good a fire keeper twenty years hence as it is today.

The Hot Blast Air-Tight Florence will heat twice the space that can be heated by any other stove on earth at one-half the cost.

The only perfect floor heater that is or has been made.

All features are patented and no stove manufacturer, dealer or user can copy or use same until the expiration of the patent without incurring liability for an action for damages.

Will burn a ton less of hard coal than a hard coal Base Burner of the same size and heat twice the space.

THE HOT BLAST AIR - TIGHT FLORENCE burns soft coal or slack and all the smoke and gases. No filling up of the stove, pipe or flue with soot. No dirt inside or outside the house. It will burn hard coal and all the gases which escape from the hard coal base burner. It will burn wood and sawdust, wet or dry. It will produce one-half less ashes than any other stove on earth with any kind of fuel and leave no clinkers or half consumed coal.

At the end of the season's use with soft coal, there will be no soot in the pipe or flue.

THE ZENITH OF STOVE PERFECTION

If you need a gas heater we can fill the bill with the best the market affords. We sell Garland Stoves and Ranges for gas and the Toledo & Born Steel Range for coal—all are classed as the Florence heater, as top notchers.

We say, buy a Hot Blast **Florence** Soft Coal Heater
and save one-half your coal bills. The FLORENCE will do it

Ask any of the happy comfortable people if every claim we make for the HOT BLAST, AIR TIGHT FLORENCE is not actually fulfilled to the very letter. Here are some of the people to whom we have sold Florence Hot Blast Air - Tight stoves who may be within easy reach of you. Ask them—any of them, or all, for that matter, how they find the Florence performs, then draw your own conclusions. We actually believe no other heater approaches it—if we thought otherwise we would leave no stone unturned until we got its superior to sell.
